SUMMARY

Full-Stack Software Engineer with 5+ years of experience delivering .NET and React solutions across SaaS, e-commerce, and enterprise platforms. Proven track record of boosting system performance, modernizing legacy codebases, and shipping features that tangibly improve user and team outcomes. Experienced tech lead comfortable owning end-to-end delivery and mentoring engineers.

TECHNICAL SKILLS

Languages: C#, Java, JavaScript, TypeScript, SQL

Frontend: React, Angular, AngularJS, Next.js, Tailwind CSS, jQuery, HTML/CSS

Backend: .NET / ASP.NET Core, Spring Boot, Node.js, REST APIs

Tools & Cloud: AWS (Certified), Git, Azure DevOps, Salesforce Integration

Other: Agile/Scrum, Technical Documentation, Code Review, Mentorship

EXPERIENCE

Lead Software Engineer · [WorkWave \(formerly RealGreen\)](#)*Remote* | Feb 2022 – Present

- Appointed lead developer on a major application rewrite; coordinated cross-functional delivery across product, QA, and engineering while maintaining documentation that kept all stakeholders aligned.
- Reduced Tenant List load times from ~10 seconds to 0.8 seconds and User List load times from ~8 seconds to 0.1 seconds — an 80–99% improvement in responsiveness.
- Developed User Suspension functionality in the admin portal, increasing Support Team operational efficiency by 50%.
- Accelerated QA testing workflows by 80% by building a Bulk Account Upload debugging tool, directly shortening release cycles.
- Rewrote the Customer Portal Settings page from AngularJS to React, reducing technical debt and enabling faster iteration.
- Led a compliance upgrade with the State of New York to modernize the internal Pesticide Application Generator, ensuring adherence to evolving state regulations.
- Built a Trial Tenant onboarding workflow, streamlining new customer activation and reducing time-to-value.
- Introduced a Mobile Permissions framework that expanded platform flexibility and accessibility across devices.
- Created identity editing and debugging tools for the Engineering team, reducing troubleshooting time on user account issues.
- Optimized the Contact widget load time from seconds to milliseconds, improving core engagement metrics.

Software Engineer II · [FYE \(For Your Entertainment\)](#)*Albany, NY* | Jun 2021 – Feb 2022

- Integrated a Salesforce-backed discount modal popup across front-end and back-end systems, impacting millions of users with a smoother checkout experience.
- Automated return refund processing with Spring Boot Java, significantly reducing manual handling for customer support.
- Built an internal employee portal using Next.js, centralizing resource access and improving team productivity.
- Maintained production stability through a 24/7 on-call rotation, resolving intermittent issues to minimize downtime.

Associate Software Engineer · [Bestpass](#)*Albany, NY* | Sep 2019 – Jun 2021

- Led a full rebranding of the Customer Portal Site in collaboration with QA, delivering a consistent and modernized user experience.
- Played a key role in migrating the legacy VB codebase to modern C#, significantly improving long-term maintainability.
- Built an Onboarding Application for vehicle registration using .NET and Angular, simplifying workflows for both users and operations.

- Integrated a third-party Vehicle API into the Vehicle Support Onboarding App, working directly with customers to ensure smooth adoption.
- Refactored internal Fulfillment Team tools to streamline operations and improve throughput.

CERTIFICATIONS

AWS Certified – Developing Serverless Solutions on AWS · *Issued 2023*

EDUCATION

Bachelor of Technology, Computer Systems

City Tech CUNY · 2016

Building Enterprise Software – Certification Program

LaGuardia Community College · 2017–2018
